Cable Decision

Cable options for the **digiDL^H+HX**

RECOMMENDED ✓

Enhanced Tachograph Cable (ETC)

Recommended for all installations, this cable combines the standard loom, double plug adapter (Mercedes and Volvo), the CAN Y cable, simplifies CAN termination and now includes ignition input for the **H + HX**"

Standard Tachograph Cable

This standard loom cable allows you to connect your tachograph to the **digiDL-H** or **HX**.

Download Button

A button to trigger the download of the driver card.

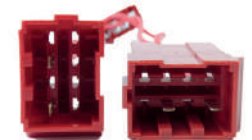

Extension Cable

This is a 1 metre extension cable allowing you to install your **H** or **HX** unit further from the tachograph.

Y-Cable

Plug used for sharing CAN-C connection to the Tachograph.
