digivu+
Portable Driver Card & Vehicle Unit Download

Low Cost Combination for Driver Card & Vehicle Unit Download

Key Features

- A fast & efficient download tool
- Downloads vehicle unit and driver card data
- Customisable settings to optimise performance
- Intelligent internal file management
- Helps you to stay legally compliant

Vehicle unit & driver card combo

The power of **digivu** has been combined with our card reading technology to give you a low cost yet highly efficient way to download vehicle unit and driver card data. Purchase a **digivu+** kit and you can read and store both driver card and vehicle unit data on the included **digivu**. The **digivu+** is powered by an independent battery source, which in turn powers the **digivu**.

digivu will store all of the driver card and vehicle unit data until you connect it to a PC. When you connect to a PC, all of the data can be automatically downloaded by our digiconnect software. The **digivu** is supported by all the major UK analysis bureau. No additional software setup, beyond the standard **digivu** setup, is required to support **digivu+**.

Intelligent filing

digivu manages its own files including archiving and cleaning up partial downloads caused by any power interruptions. As it has its own file system, it cannot be written to inadvertantly by viruses.
