

A BLUETOOTH™ INTERFACE TO YOUR TACHOGRAPH FOR ANDROID PHONES AND TABLETS

Digifob for Android applications

To start using the digiBlu you simply download your free Tachosys Android applications from Play.Google.com (The Android market).

There are 3 applications;

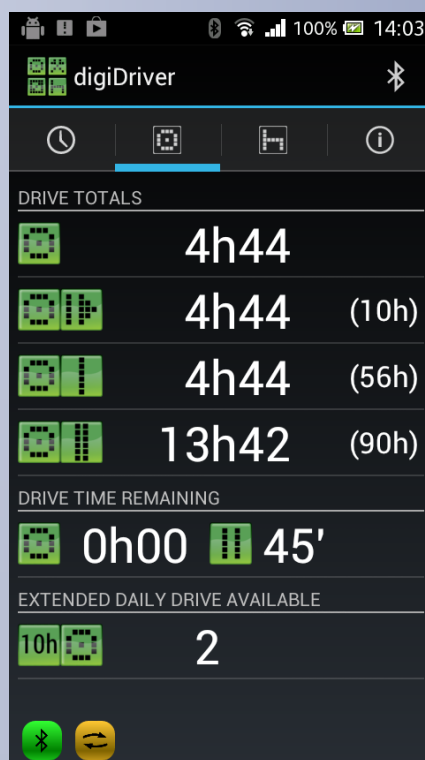

- 1) digifob for Android (best for pre 2012 Tacho)
 - 2) digidriver (best for Tachographs from 2012)
 - 3) digidownload (All Tachographs)
- 1) and 2) provide up to the second Drivers Hour's information with visual warnings when you need to take a break.

digidownload (3) will download the driver card and the Tachograph to your mobile device which can then be emailed or automatically uploaded to a participating online provider.
